- Ditch the colored circles (was a bad idea on my part)
- No Border on section titles
  - o Increasing the title size
  - o All-Caps on Big Section titles
- Margin on the bottom (between footer and body)
- Color for each page
  - o Refer to my email!
- Title with alternating colors that matches each section
- Sources page
  - o Replace with book links
    - Covers of books, click and link to amazon buy link
- Nav Bar
  - o When the color stays when it's active
  - o No underline
- Responsiveness
  - o Wrap to single column
  - o Title > Illustration > Body
- Color of the footer
  - o Same with body, line on the top
  - o Column width matched with header, line not going till the end
